

## Methods, Attributes and Functionalities of All Files

The Bowling Management System codebase has a collection of a total of 29 files. Each file has a collection of classes and functions that help simulate the entire game.

Here is a list of all the files and their corresponding characteristics:

SNo.	File Name	Methods	Attribute	Major Functionalities	Interlinked Classes
1.	AddPartyView	<ul style="list-style-type: none"> <li>void actionPerformed()</li> <li>void valueChanged()</li> <li>Vector getParty()</li> <li>Vector getNames()</li> <li>void updateNewPatron()</li> </ul>	<ul style="list-style-type: none"> <li>Vector party</li> <li>Vector bowlerdb</li> <li>ControlDeskView controlDesk</li> <li>String selectedNick</li> <li>String selectedMember</li> </ul>	<ul style="list-style-type: none"> <li>Adding a new patron to party</li> <li>Removing a patron from a party</li> <li>Creating a new patron</li> <li>Finished party selection</li> <li>Returning the latest state of the party</li> </ul>	<ul style="list-style-type: none"> <li>NewPatronView</li> </ul>
2.	AddPartyView	<ul style="list-style-type: none"> <li>ControlDesk getControlDesk()</li> </ul>	<ul style="list-style-type: none"> <li>ControlDesk controldesk</li> </ul>	<ul style="list-style-type: none"> <li>Return Current state of ControlDesk</li> </ul>	<ul style="list-style-type: none"> <li>ControlDesk</li> </ul>
3.	Bowler	<ul style="list-style-type: none"> <li>String getNickName()</li> <li>String getFullName ()</li> <li>String getNick ()</li> <li>String getEmail ()</li> </ul>	<ul style="list-style-type: none"> <li>String fullName</li> <li>String nickName</li> <li>String email</li> </ul>	<ul style="list-style-type: none"> <li>Getter functions</li> <li>Validation of the bowler</li> </ul>	NIL
4.	BowlerFile	<ul style="list-style-type: none"> <li>static Bowler getBowlerInfo(String nickName)</li> <li>static void putBowlerInfo(String nickName,String fullName,String email)</li> <li>static Vector getBowlers()</li> </ul>	<ul style="list-style-type: none"> <li>static String BOWLER_DAT</li> </ul>	<ul style="list-style-type: none"> <li>Adding a new bowler</li> <li>Getting details of one bowler</li> <li>Getting details of all bowlers</li> </ul>	NIL
5.	ControlDesk	<ul style="list-style-type: none"> <li>void run()</li> <li>Bowler registerPatron(String nickName)</li> <li>void assignLane()</li> <li>void addPartyQueue(Vector partyNicks)</li> <li>Vector getPartyQueue()</li> <li>int getNumLanes()</li> <li>void publish(ControlDeskEvent event)</li> <li>HashSet getLanes()</li> </ul>	<ul style="list-style-type: none"> <li>HashSet lanes</li> <li>Queue partyQueue</li> <li>int numLanes</li> <li>Vector subscribers</li> </ul>	<ul style="list-style-type: none"> <li>Setter and Getter functions</li> <li>Broadcast an event to subscribing objects.</li> <li>Creating a new patron</li> <li>Finished party selection</li> <li>Returning party names to be displayed in the GUI representation of the wait queue.</li> <li>Main loop for ControlDesk's thread</li> <li>Registering a Patron</li> <li>Assigning a lane</li> </ul>	<ul style="list-style-type: none"> <li>Lane</li> </ul>

SNo.	File Name	Methods	Attribute	Major Functionalities	Interlinked Classes
6.	ControlDeskEvent	<ul style="list-style-type: none"> <li>Vector getPartyQueue()</li> </ul>	<ul style="list-style-type: none"> <li>Vector partyQueue</li> </ul>	<ul style="list-style-type: none"> <li>Returns a vector of the names of the parties in the waiting queue</li> </ul>	
7.	ControlDeskObserver	<ul style="list-style-type: none"> <li>void receiveControlDeskEvent</li> </ul>	NIL	<ul style="list-style-type: none"> <li>Interface for classes that observe control desk events.</li> </ul>	<ul style="list-style-type: none"> <li>-----</li> </ul>
8.	ControlDeskView	<ul style="list-style-type: none"> <li>void actionPerformed(ActionEvent e)</li> <li>void updateAddParty(AddPartyView addPartyView)</li> <li>void receiveControlDeskEvent(ControlDeskEvent ce)</li> </ul>	<ul style="list-style-type: none"> <li>int maxMembers</li> <li>ControlDesk controlDesk</li> </ul>	<ul style="list-style-type: none"> <li>Display the GUI for the control desk</li> <li>Handler for actionEvents</li> <li>Receive a new party from andPartyView</li> <li>Receive a broadcast from a ControlDesk</li> </ul>	<ul style="list-style-type: none"> <li>ControlDesk</li> <li>AddPartyView</li> </ul>
9.	drive	<ul style="list-style-type: none"> <li>static void main()</li> </ul>	<ul style="list-style-type: none"> <li>int numLanes</li> <li>int maxPatronsPerParty</li> </ul>	<ul style="list-style-type: none"> <li>Driver class for the entire game</li> <li>Creates and alley with numLanes number of lanes</li> <li>Activates the control desk object</li> <li>Render the GUI for the control desk via ControlDeskView</li> </ul>	<ul style="list-style-type: none"> <li>ControlDesk</li> <li>Alley</li> <li>ControlDeskView</li> </ul>
10.	EndGamePrompt	<ul style="list-style-type: none"> <li>EndGamePrompt( String partyName )</li> <li>void actionPerformed(ActionEvent e)</li> <li>int getResult()</li> <li>void distroy()</li> </ul>	<ul style="list-style-type: none"> <li>int result</li> <li>String selectedNick</li> <li>String selectedMember</li> </ul>	<ul style="list-style-type: none"> <li>Displaying the end prompt</li> <li>Destroying the currently active game object.</li> </ul>	<ul style="list-style-type: none"> <li>-----</li> </ul>
11.
